

# RESIMAX SNOW PRIMER

**Old Stains Remover**

## What is it?

**PRIMER** is a special formula designed to soften very old stains of oil and grease in order to bring them back on the surface and remove them completely thanks to SNOW powder treatment.

The sale of PRIMER old stains is advised together with SNOW at the following selling points: hardware shops, dye factories, households, building and ceramic companies, bathrooms and accessories, car accessories, etc.

## Why choose it?

PRIMER removes even old stains.

## How to use it?

- Spray PRIMER directly on the stain to be softened.
- Wait for 3/5 minutes.
- Form with SNOW powder a barrier around the stain.
- Once more cover the stain to be treated with SNOW powder and wait for other 3/5 minutes.
- Brush the powder on the stain applying circular movements and pushing through a brush or broom with hard bristles until the stain is completely absorbed.
- Should be necessary repeat the treatment.

## Where to use it?

- Hardware
- dye factories
- households
- building sector,
- car accessories, etc.
